
Client Benefits

High Quality Personal Service

Meeting client expectations

One aspect which sets us apart from our contemporaries is our dedication to meeting the expectations of our clients. We spend a large amount of time in the beginning of each project listening and aligning our expectations with the expectations of the client to ensure that we are on the same page. The clients benefit is we listen, understand, and then explain project details so they are not sprung for extra cost late in the game.

We provide complete project management and client service

In our mission to produce the highest quality of service for our clients we offer complete project management. Each and every client is valued. We want to help make them successful in their endeavors. That is why we handle everything from the actual wall measurements to the final installation, including large projects outside of Denver, Colorado.

Every detail of the project requires the best execution on all the processes involved, we don't like to leave our clients with responsibilities that fall outside their core practices. To account for this we spend the amount of time necessary on each work site to produce the highest quality of results, we also work with our network of experts to make sure that the true project vision is realized.

Creating value for our clients

Our mission with every project is to leave interior surroundings better than we found them. We seek to find rare and innovative design solutions that help refine the spaces in which they are displayed. When we are successful in our mission it's a win-win outcome for all parties involved. Great design enhances life and that creates value, we help our clients create great design.

Educating our clients

When we commit to a project, we are fully committed members of a team. Our job is to educate our team members on our area of expertise as well as make to professional suggestions about the best course of action.

We help our clients understand their problems, issues and design opportunities in new or different ways. We help our clients arrive at new or better solutions to their problems than they would have discovered on their own. We are our client's advocates; we use our resources to deliver customized or unique solutions to meet the client's special needs.

Our desire to push boundaries

We live outside of the box and we always wish to go beyond the conventional way of thinking. We work hard execute to the best of our abilities to create something unique. If there is a better way to do something, we will figure it out and bring the benefits to our clients.

Custom design and the luxury of rarity

Have your wall covering custom designed by a recognized and experienced professional. The solutions

are specified to meet the needs of the client. When the time comes for plans to turn into actions the client can rest assured that they will acquire a design element that is unique and all their own.

Green Design

At Contemporary Design Interiors we are committed to the availability of products that meet or exceed green specifications. We understand that we all have one home which requires stewardship and we want to help to do our part. In addition to helping to preserve our environment going green is good business, it's an opportunity for a win-win outcome for everyone involved. Although it may be more of an investment on the front end it is sure to yield higher returns over time.

Cutting edge design methods and project management

We are always in the process of finding the most efficient methods and technologies for the creation of our innovative project content as well as for project management. Communication is crucial to a projects success so we are always devising ways to ensure that all participants are on the same page in real-time.

We build relationships with our clients

Our ultimate goal is to satisfy the needs of our clients as well as to build and maintain long-term relationships with them. We work to add value to the projects of our clients thru all possible means. We wish to be the primary care givers for the walls of their interior spaces.

High Performance Products :: Type II Wall Covering

Performance:

The wallpaper and borders are made of a latex-saturated paper stock. Handling and performance features are similar to those of a vinyl-coated paper. The product is strippable with recommended pastes and wall preparation. We can produce custom wallpaper and borders in any size.

Features:

Type II is a medium-duty wall covering. It weighs between 20 oz. per linear yard (based on a 54" width) and is produced on Osnaburg (poly-cotton or polyester) or non-woven fabric backing.

Reliability:

All materials are warranted.

Conformance:

The linear yard (based on a 54" width) is the most widely specified width for wall coverings.

Durability:

Type II is considered the "work-horse" among vinyl wall coverings and is typically specified for areas where greater than normal traffic and surface abrasion is evident or expected. It is ideal for offices, hospital wards, public areas and rooms in hotels, lounges, dining rooms, public corridors and classrooms.

Serviceability:

The easiest wallpaper to hang and clean is vinyl or vinyl-coated paper. Vinyl is scrubbable, which means you can clean it with a sponge and cleaning solution. Vinyl is also the most durable.

Aesthetics:

After the wall covering is printed and coated, the paper will have a lustre finish (between matte and gloss).

Duraprene :: Green Design Option

Performance:

Duraprene is a sustainable, high performance wall covering. Since its introduction, Duraprene has become an industry classic. It has become standard in numerous sustainable design projects.

Features:

- is one of the industry's best replacements for vinyl available today.
- is made from wood and synthetic latex then sealed with urethane.
- is chlorine free
- the wood pulp component is comprised of: 50% sustainably forested wood pulp from Pan European Forest Certified (PEFC) Swedish forests and Forest Stewardship Council (FSC) certified Canadian forests. 40% recycled post-industrial waste (recycled cardboard from carton manufacturing) 10% recycled post-consumer waste (recycled office waste).
- is printed with a variety of different inks, most of which are water based. Occasionally we use non water-based inks depending upon the effect requested by clients.
- the water used to bond the wood pulp and latex together is re-used at a rate of 84%.
- the amount of energy used in manufacturing is far less than with conventional wall coverings; there are far fewer steps involved; it is a continuous process. Duraprene is a beautiful alternative to PVC wall coverings and works well for corporate, healthcare and hospitality.

Reliability:

All of our materials are warranted.

Conformance:

The linear yard (based on a 54" width) is the most widely specified width for wall coverings.

Durability:

Duraprene is made without the use of petrochemicals. It is a composite of recycled wood pulp and responsibly forested wood fibers fused with latex. It is pulped and bonded in latex under high

compression then sealed in a chemical bond with a patented urethane sealant. The pressurization of the fibers is key to its durability; the fibers interlock and cannot be torn.

The solutions used in bonding and sealing are water-based, adding to the products environmental characteristics. The latex bonding solution is an emulsion of carbon-based organic chains. It has no chlorine.

Serviceability:

The cleaning and maintenance qualities are superior to those of vinyl. Powerful cleaning agents can be used without stripping the color.

Aesthetics:

The product also absorbs inks and surface dyes in pattering, giving the material deeper saturation than vinyl. It also responds to inks and surface dyes better than conventional substrates. Fine art printing techniques are used to achieve the rich aesthetic.
